Accessible and customizable components built with Tailwind and Shadcn.

🔗 <https://eo-n.vercel.app/>

- Developed a modular, accessible UI primitives library built on **Tailwind CSS**, **shadcn/ui**, and **Base UI**, providing both headless and fully styled components—such as buttons, dialogs, cards, tooltips, and tabs—out of the box.
- Maintained full documentation and a live demo site for easy onboarding; enabled install via npm or CLI for streamlined developer integration.
- Recognized within the shadcn/ui ecosystem as an “opinionated component library” that bridges unstyled primitives with styled variants, currently garnering community attention and adoption.
